

# CONTENTS

<b>Preface</b>	<b>xi</b>
<b>Contributors</b>	<b>xiii</b>
<b>List of participants</b>	<b>xv</b>
<b>Other communications</b>	<b>xxiii</b>
<b>Published articles</b>	
Schauder estimates for discrete fractional integrals <i>L. Abadias, M. de León-Contreras and J. L. Torrea</i> .....	<b>1</b>
Relative entropy inequality for dissipative measure-valued solutions of compressible non-Newtonian system <i>H. Al Baba, M. Caggio, B. Ducomet and Š. Nečasová</i> .....	<b>11</b>
Blow up of the solutions to a linear elliptic system involving Schrödinger operators <i>B. Alziary and J. Fleckinger</i> .....	<b>21</b>
Steady-state analysis of the single vacation $PH/MS P/1/\infty$ queue using roots <i>A. D. Banik, M. L. Chaudhry and F. Avram</i> .....	<b>31</b>
Optimal partitions for the sum and the maximum of eigenvalues <i>B. Bogosel and V. Bonnaillie-Noël</i> .....	<b>41</b>
Stability results for nematic liquid crystals <i>H. R. Clark, M. A. Rodríguez-Bellido and M. A. Rojas-Medar</i> .....	<b>55</b>
Efficient numerical methods for singularly perturbed systems of reaction-diffusion type <i>C. Clavero and J. L. Gracia</i> .....	<b>63</b>
Lie algebras and geometric complexity of an isochronous center condition <i>J. Cresson and J. Palafox</i> .....	<b>75</b>
Numerical approximation of singularly perturbed reaction-diffusion problems with the virtual element method <i>J. L. Gracia and D. Irisarri</i> .....	<b>85</b>
Numerical approximation of a time fractional-derivative initial-boundary value problem with boundary layer <i>J. L. Gracia, E. O’Riordan and M. Stynes</i> .....	<b>95</b>

VMS error estimation for computational fluid mechanics <i>G. Hauke and D. Irisarri</i> .....	107
The regular polygon problem of $(N + 1)$ bodies: the past, the present and the future <i>T. J. Kalvouridis</i> .....	117
A new inhomogeneous lognormal diffusion process with exogenous factors in the diffusion coefficient <i>A. Nafidi and R. Gutiérrez- Sánchez</i> .....	131
Non-spectral frequency indicators <i>M. A. Navascués, M. V. Sebastián and C. Ruiz</i> .....	139
Non-reflecting boundary conditions for surface water wave simulation in the vicinity of a solid body <i>J. M. Orellana</i> .....	149
Parameter-uniform numerical methods for singularly perturbed problems <i>E. O’Riordan</i> .....	159
Companion matrices and joint eigenvectors of commuting families of matrices for polynomial zero finding <i>T. Sauer</i> .....	171
Fractional Calculus as a modeling framework <i>L. Vázquez, M. P. Velasco, D. Usero and S. Jiménez</i> .....	187
$L^1$ -contraction and strong convergence of approximations for a pseudomonotone SPDE <i>A. Zimmermann</i> .....	199
