Speaker	Title	Start at 12:00
Dr. Carlos Marcuello	Quantitative determination of physicochemical properties of soft matter by AFM	20th November 2020
Dr. Marta Navarro	Ultrathin and semi-thin sections of biological and polymeric samples for TEM and SEM	18th December 2020
Dr. Angel Merchán-Pérez	Use of Dual Beam for brain studies	15th January 2021
Dr. Blanca Bauluz	Use of Dual Beam for fossil studies	5th February 2021
Dr. Alvaro Mayoral	Towards local and averaged structural solution of catalysts at atomic level	26th February 2021
Dr. Leyre Hernández	2D metal-organic networks: electronic and magnetic properties	12th March 2021
Dr. José M ^a de Teresa	New developments and applications in Dual Beam	9th April 2021
Dr. Simon Hettler	Phase plates in Transmission electron microscopy	30th April 2021
Dr. David Serrate	New SPM techniques in the LMA portfolio: piezoresponse microscopy, non-contact AFM and molecular nanoprobe.	21st May 2021
