

Dear Colleagues and Friends,

We would like to remind you that the first installment of our new on-line series

[CECAM Mixed-Gen](#)

will take place on **January 28 2021 from 15:00 to 19:00 CET** with a session dedicated to the broad topic of Activated Events.

The session will be opened on Zoom by **Prof. Christoph Dellago**, University of Vienna, with a seminar titled **“Bridging time scales in molecular simulations”**. Prof. Dellago’s talk will be followed by two presentations from PhD students or researchers in their first Post-doc. These presentations will be selected from the poster submitted for the second part of the event: a poster session hosted on Gather where young researchers will have an opportunity to interact with our speaker and other leading experts in the area of activated events.

More information, including the current list of participants and important deadlines for registration and submission of posters, can be found at

<https://www.cecaml.org/workshop-details/1071>

Details on the Zoom and Gather connections will be provided closer to the date of the event.

Please continue to disseminate this information to PhD students and young researchers potentially interested in submitting a poster. Of course, more senior members of the CECAM community - always young at heart - are also very welcome!

Best wishes,

The CECAM Team in Lausanne
