

**REGISTRATION IS OPEN:** <https://www.mosbri.eu/events/conferences/zaragoza-2023/>

The European Molecular Scale Biophysics Research Infrastructure: [MOSBRI](https://www.mosbri.eu), will celebrate in **5<sup>th</sup>-7<sup>th</sup>** June, its annual conference in Zaragoza, Spain.

We encourage you to come to present and discuss your results with some of the best European biophysicists, relevant international companies and young beneficiaries of free transnational access to MOSBRI laboratories and instrumentation.

The conference is organized around 8 scientific topics:

- SESSION 1: Protein stability, quality control and standards
- SESSION 2: Redesigning Biomolecules to improve performance
- SESSION 3: Macromolecular interactions: kinetics and thermodynamics
- SESSION 4: Architecture of macromolecular assemblies, allostery and protein dynamics
- SESSION 5: Single molecule and time resolved analyses
- SESSION 6: Membranes and condensates
- SESSION 7: Molecular bioimaging
- SESSION 8: Computational approaches in biophysics

*Deadline for registration is **30<sup>th</sup> April 2023***

*Young researchers can benefit from **20 scholarships** covering registration and 2 hotel nights*

We look forward to seeing you in Zaragoza!

Javier Sancho and Adrián Velázquez-Campoy  
on behalf of the organising committee
