The School on Organometallic Chemistry Marcial Moreno Mañas is an annual activity of the Consolider Ingenio Orfeo Team CSD2007-00006. The meeting aims to the generation of an exciting, top level scientific environment to facilitate the exchange of information and knowledge among young students, early-career researchers, and well recognized, world-leading scientists.

In addition to the plenary lectures, the school will feature short talks and poster presentations by the students, and open discussions among members of the Consolider Orfeo Team, as well as the other attendants. The Organizing Committee might offer grants covering registration fees for students external to the Consolider Team.
